

# Examination/Assessment Management with EDUMAAT

SMARTER STUDENT LIFECYCLE—SIMPLIFIED AND CENTRALIZED

# Making Exams Easy to Plan, Conduct, and Evaluate

Examinations are at the core of the academic process. They help measure student learning, guide teacher improvement, and shape future decisions. But planning and managing exams in a school or college can be a huge challenge—preparing schedules, organizing question papers, assigning invigilators, tracking marks, and generating report cards all involve a lot of manual effort and coordination.

The Examination/Assessment Management Module in EDUMAAT ERP is designed to simplify this entire process. It gives institutions a complete digital solution to plan, conduct, and evaluate exams with speed, accuracy, and transparency.

Whether it's a term-end test, internal assignment, online quiz, or board exam—EDUMAAT ensures everything runs smoothly and stress-free.

### End-to-End Exam Management, All in One Place

The module supports the full exam cycle from start to finish. Institutions can define exam types (unit test, term exam, practicals, internal assessment, final boards) and set up rules for grading, weightage, and pass criteria.

Once exams are scheduled, students and teachers are notified automatically. Seating plans, hall tickets, and invigilation schedules are generated instantly. Marks can be entered directly by subject teachers, either manually or via file upload. The system auto-calculates grades, totals, and performance indicators. At the end, customized report cards are generated—ready for download or print—with no delay or errors.

### Smart Scheduling and Flexible Setup

Creating a balanced and conflict-free exam schedule can take days if done manually. With EDUMAAT, this task becomes much easier. The system allows exam coordinators to:

- Set up class-wise or subject-wise exam timetables
- Avoid overlapping schedules for shared teachers or optional subjects
- Define exam formats for theory, practical, oral, or online tests
- Customize duration, marks, and attendance rules

The exam schedule is shared with students, parents, and teachers through the portal or mobile app—ensuring everyone is prepared in advance.

### Seamless Assessment Entry and Result Calculation

Entering marks is often time-consuming and prone to errors. EDUMAAT simplifies this with a clean, structured mark entry system.

Teachers can:

- Enter marks online after each exam
- Add remarks or grade-based comments
- Use bulk upload tools to save time
- Track students who missed exams or need re-tests

The system then automatically calculates:

- Subject-wise and total scores
- Grades based on predefined ranges
- Percentage and rank
- Attendance-linked eligibility

All this reduces manual calculation, avoids mistakes, and speeds up result publication.

### **Personalized Report Cards and Analytics**

Once the evaluation is done, EDUMAAT generates professional report cards customized to the institution's format. These include:

- Student photo and basic details
- Subject-wise marks and grades
- Overall result summary
- Attendance records
- Teacher or principal remarks
- Signatures and school logo

Report cards can be downloaded, printed, or shared digitally. They are also archived in the student's profile for future access.

In addition, EDUMAAT offers analytics to help institutions understand academic performance better—such as subject-wise averages, top performers, improvement areas, and class-wise comparison charts.

### **Support for Online and Continuous Assessments**

Modern education goes beyond final exams. With EDUMAAT, institutions can also manage:

- Online tests and quizzes
- Weekly assignments
- Project submissions
- Internal reviews and feedback

Teachers can set up evaluation criteria, upload assignments, and grade students continuously. This helps in measuring progress regularly and giving timely support where needed.

### **Integrated with Other EDUMAAT Modules**

The Examination/Assessment Module works closely with other parts of the EDUMAAT system:

- Student Management: Exam data is automatically linked to the student's academic profile
- Timetable: Avoids class conflicts when exams are scheduled
- Communication: Notifies students and parents about results, schedules, and retests
- Attendance: Ensures students meet minimum attendance before writing exams
- Document Management: Stores and retrieves marksheets and exam records with ease

This integration saves time, reduces rework, and creates a seamless academic management system.

**EDUMAAT brings clarity, speed, and control to the examination process—so that educators can focus on teaching, and students can focus on learning.**

One Solution, Endless Possibilities
