

Notification and Reminder Management with EDUMAAT

SMARTER STUDENT LIFECYCLE—SIMPLIFIED AND CENTRALIZED

Keep Everyone Informed and On Time

In any educational institution, communication is key. Whether it's about fee payment dates, exam schedules, PTA meetings, or a simple announcement, ensuring that the right message reaches the right people at the right time is critical.

Missed messages can lead to confusion, missed deadlines, and poor coordination. That's why EDUMAAT's Notification and Reminder Management Module was designed—to deliver clear, timely, and targeted communication to students, parents, teachers, and staff.

It takes away the need for manual phone calls, printed circulars, or WhatsApp follow-ups by offering a smart and automated way to send alerts and reminders directly from the system.

How It Works: Smart, Automated Communication

The Notification and Reminder module is fully integrated into EDUMAAT ERP. It tracks activities, deadlines, and schedules across all modules—like fees, exams, classes, events, and more—and sends notifications automatically based on defined rules.

For example:

- If a fee due date is approaching, parents and students get an automatic reminder.
- If an exam timetable is published, students are instantly notified.
- If a library book is overdue, the system alerts the user to return it.
- If a staff meeting is scheduled, teachers receive timely reminders.

These notifications are sent via:

- SMS
- Email
- Mobile App Push Notifications
- Web Dashboard Alerts

This ensures that no one misses important updates—whether they are on campus or off-site.

Benefits for Everyone on Campus

For Students:

- Get reminders about class tests, assignment deadlines, exam schedules, or activity days
- Stay informed about class changes or cancellations
- Never miss an update from school again

For Parents:

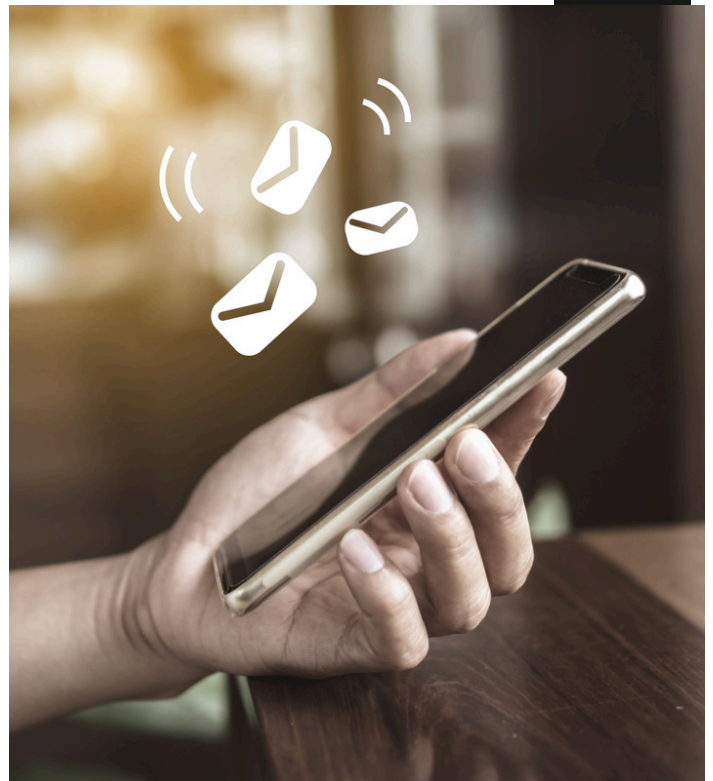

- Receive alerts about fee dues, PTA meetings, progress reports, and important events
- Improve communication with school without needing constant follow-ups
- Stay engaged with their child's academic progress

For Teachers and Staff:

- Receive internal updates about schedule changes, HR announcements, or resource bookings
- Get reminders about tasks, meetings, or duties
- Communicate instantly with specific classes or student groups

For Admins and Management:

- Automate bulk communication to students, parents, or staff
- Avoid last-minute rushes by reminding people in advance
- Improve transparency and accountability across departments

Customizable and Targeted Notifications

One of the best features of this module is that it allows targeted messaging. Admins can choose:

- Who receives the message (all students, one class, specific students or parents, teachers, staff)
- What the message should say (custom subject and content)
- How it is sent (SMS, email, app, dashboard)
- When it is sent (immediate, scheduled, or recurring)

You can also link messages to events—for example, sending an automatic fee reminder 3 days before the due date, or notifying students 1 hour before an online class begins.

This level of customization ensures that messages are always relevant and never missed.

Event and Calendar Integration

The module is directly integrated with the institutional calendar and key academic workflows. For every event or deadline that is set in the system—whether it's an exam date, holiday, internal review, or fee schedule—EDUMAAT automatically prepares and sends the appropriate notification.

Users can also see upcoming events and reminders in their personal dashboard or mobile app, keeping everyone informed without needing constant manual updates.

Full Log and Message Tracking

EDUMAAT keeps a full history of sent messages and delivery status. Admins can view reports on:

- Message delivery (sent, delivered, failed)
- Response status (seen, clicked)
- Who received each message and when
- Reminder frequency and follow-up status

This helps the institution track communication performance and ensure that important messages are reaching their audience.

Integration with Other EDUMAAT Modules

Because this module is part of the EDUMAAT ERP, it works with:

- Fees Module – Remind about due dates, payment confirmations, or discounts
- Examination Module – Notify students about hall tickets, marks, or result dates
- Attendance Module – Alert parents about student absences
- Library, Hostel, Transport Modules – Share availability, dues, room or seat changes
- Task & To-Do Module – Remind staff about pending work and deadlines

The module acts like a bridge—connecting important actions across your ERP to the people who need to know about them. EDUMAAT ensures every voice is heard, and every message is delivered.

One Solution, Endless Possibilities
